

ALGAE

Terms

ascomycete
basidia (pl.)
basidiomycete
decomposer
dikaryotic cell
entomophagus
fruiting body
fungal host
heterotrophic
holdfast
hyphae
kelp
lichen
mycelium
mycorrhiza
ringworm

Concepts

+ and - spores, hyphae
3 groups of multicellular algae
age of first land plants
external digestion
features of Cooksonia
fungal decomposition
lichen symbiosis
multicellularity
mycorrhizal symbiosis

Processes

phylogeny of mjr. land plants
Evolution of multicellularity
Fungus life cycle
