

<u>Terms</u>	<u>Concepts</u>	<u>Processes</u>
appendicular skeleton		
articulated	(vs. disarticulated)	skeletal regions antagonistic muscle pairs
atlas bone		
axial skeleton		functions of bone
axis bone		
bone process		
BONES		
carpal		
caudal region		
cervical region		
clavicle		
coccyx		
costal cartilage		
disarticulated	(vs. articulated)	
facet		
femur		
fibula		
foramen		
fossa		
humerus		
hyoid		
intervertebral discs		
lumbar region		
metacarpal		
metatarsal		
mineralized matrix		
os coxa		
osteocyte		
pectoral girdle		
pelvic girdle		
petella		
phalange		
radius		
red marrow	(vs. yellow marrow)	
sacral region		
sacrum		
scapula		
socket joint		
sternum		
talus		
tarsal		
thoracic region		
tibia		
trochlea		
true bone		
ulna		

yellow marrow

(vs. red marrow)
