

IMMUNE

Terms

antibodies
B antibodies
B cells
benign tumor
blood serum
cancer
carcinogens
cell-mediated immunity
contact inhibition
helper T cells
humoral immunity
interstitial fluid
killer T cell
lymph capillary
lymph fluid
lymph node
lymph vessel
lymphatic system
lymphocytes/white blood cells
macrophage
mad cow disease
malignant tumor
metastasized
natural killer cell
phagocytosis
prion
reverse transcriptase
specific immune response
thoracic duct

Concepts

3 levels of defense against microbes
anatomy of the HIV virus
cell-mediated immunity
general anatomy of viruses
humoral immunity
immune system memory
successive body fluid names in lymph/blood systems
types of lymphocytes/white blood cells
why viruses invade host cells

Processes

HIV reproduction
