

SPECIATION terms and processes

Terms

adaptive radiation
allopatric speciation
behavioral reproductive barrier (vs. mechanical reproductive barrier)
biological species concept
chicxulub meteor (Cretaceous/Tertiary extinction)
differential mortality
dispersal barrier
dispersal
gene flow
genetic drift
genetic isolation
mass extinction
mechanical reproductive barrier (vs. behavioral reproductive barrier)
polyploidy
punctuated equilibrium
sympatric speciation

Processes

allopatric speciation
genetic isolation
sympatric speciation by ecological
sympatric speciation by polyploidy
punctuated equilibrium
sea level rise by global warming

il isolation
