

VERTEBRATES

Terms

Australopithecus
Cephalochordata
Chordata
Echinodermata
Haikou fish
Homo ergaster
lancet
notochord
ossicle
Ostracoderms
placenta
Placoderms
protochordate
tetrapod
theropods

Concepts

4 groups of placental mammals
age of ape-human split
age of first *Homo*
age of first *Homo sapiens*
chordate subphyla
dinosaur ancestors of birds
fate of *Homo erectus*
features of Haikou fish
features of *Homo*
features of lancets
features of ostracoderms
features of placoderms
features that benefitted mammals after K/T extinction
K/T extinction
multiple causes of K/T extinction
number of heart chambers in modern vertebrate classes
oldest fossil vertebrates
temperature regulation in modern Vertebrate Classes

Processes

evolution of fish fins to tetrapod l
evolution of feathers from scales
human evolution

limbs
