

Roger J. Chichester

Sighting of Two  
Blue Grouse on 5/1/93  
On eastern slope of  
Peak with Min. at a  
rock outcropping. The  
had an open snow free  
area of a snow covered  
slope. The birds were  
10-15' away when I  
observed them. My  
view is mainly rear  
view as they were  
The crown of the hill  
here observed the hill  
or have lived in the  
area of the N. side  
of the peak. At the  
top of the peak  
the birds were  
observed. The  
birds were  
observed.

observed them. My  
view is mainly rear  
view as they were  
The crown of the hill  
here observed the hill  
or have lived in the  
area of the N. side  
of the peak. At the  
top of the peak  
the birds were  
observed. The  
birds were  
observed.

It was fanned out in  
flight.
